THE THIRD INTERNATIONAL SOFTWARE QUALITY WEEK EUROPE

Theme: Lessons Learned

The foremost experts from industry and academia show how important it is to accomplish system changes and testing under pressure, against a deadline, and within real-world economic constraints. Which Lessons Learned can we take to our job and enter into the next millennium prepared?

Over 50 Presentations

Learn real world solutions from the world's leading universities, corporations, and government organizations.

The QWE'99 program consists of five days of **mini-tutorials**, **panels**, **technical papers** and **workshops** that focus on software test automation and **new technology**.

QWE'99 provides the Software Testing and QA/QC community with:

- Quality Assurance and Test involvement in the development process.
- Exchange of experience-based information among technologies.
- State-of-the-art information on software quality test methods.
- Analysis of effectiveness through case studies.
- Vendor Technical Presentations.
- Vendor Show & Exhibits.

Keynote presentations aim to capture and focus results from recent efforts and to see which Lessons Learned the software quality community can apply in the coming decades.

A special Award Ceremony for:

- QWE'99 Best Paper Award
- QWE'99 Best Presentation Award

Concerned about Software Quality?

- **Get fresh perspectives from Five Keynotes**
- **Train with the leading SQA, Reliability, Testing and Software Process Gurus**
- **Discuss 52 topics - in four informative tracks on the hottest issues: e-Business Testing, Java, C++, Legal Issues of Quality, Website Testing**
- **Learn from peers and the experts - take their knowhow and experience to YOUR job**
- **Visit the Free Expo: Tools, Services, Techniques, Demos**
- **Enjoy networking at parties**

- **Special 10% discunt for Nortel Network employees**
- **Attend Mr. Walter Baziuk, Nortel Network Canada's presentation *Developing Highly Reliable Products in "Internet Time"* paper 5A, on Wednesday, 3 November, 1999, at 16:00PM.**

QWE'99 Presents

The General Conference offers three parallel tracks of presentations:

- **Tools & Technology**: Fault Tree Based Verification, Automated Test Reuse, Telecommunication Industry Aspects, TESPRA and more.
- **Applications & Solutions:** Embedded Software, Object-Oriented Software Systems, Testing Metrics, Error Trending.
- **Process & Management**: Change Control Process, Cleanroom Management, Defect Analysis, Managing Test Costs and more.
- **Bonus Conference on European Issues:** Roadmaps for SPI, Applying EFQM/SPICE Integrated Model in Industry, Testing EURO Effectively, Funding Procedures.
- **Bonus Conference on The Web**: Web Test, E-Commerce, Developing Java-Based Web Software, Website Quality Modeling & Assessment.

Tools Expo

- Exhibitors include: CMG, Computer Associates International, ErgoLight, GiTek, Integri, IQUIP, IPL, McCabe, Mercury, Q-Labs, ps_testware, Rational Software, Reasoning, Software Research and many more.
