

QualityWeek Europe 2002

Internet Now!

Brussels, Belgium | 11 March - 15 March 2002

QWE2002 Advisory Board

The 5th International Internet & Software Quality Week Europe Technical Program is reviewed by a distinguished International Board of Advisors listed below.

Advisory Members are chosen for their expertise in software testing and internet quality, software quality process, and software quality issues as well as for their contributions to the software quality field. Quality Week seeks a balance between industrial, government, vendor, and academic backgrounds. In view of the international aspect of the conference the Advisory Board includes members from many countries throughout the world.

Papers at QWE2002 are reviewed by a majority of the Advisory Board's members. Paper selections are based on the QWE2002 Advisory Board's technical content and presentation evaluation scores.

Click on a QWE2002 board member's name for a brief biographical description. Email access information and a link to each members' personal home page is included where known.
